## Powdered Laundry Soap

### Ingredients:

- 1½ cups Borax
- 1 cup Washing Soda
- 1 cup Oxi-Clean
- ½ cup Laundry Crystals (like the Purex brand)
- ½ a bar of Fels Naptha Soap- grated

Combine all ingredients and store in a container with a tight fitting cover or lid. Use about 2 tablespoons per load of laundry. This trial size will make about 4½ cups which is enough to do about 36 loads of laundry.

*Note: You may wish to grate up and use the entire bar of Fels Naptha soap. If you use the entire bar combine it with 3 cups borax, 2 cups washing soda, 2 cups Oxi-Clean, and 1 cup of laundry crystals. This will make about 9 cups or enough to do about 72 loads of laundry.*

---

## Liquid Laundry Soap with Dawn

### Ingredients:

- 3 tablespoons Washing Soda
- 2 tablespoons Borax
- 1 tablespoons Dawn Dish Soap
- 2 quarts Hot Water

Fill a 2 quart beverage container about a third of the way with very hot water. Add the washing soda and the borax and stir to dissolve. Fill the beverage container the rest of the way with water. Add the tablespoon of dish soap and stir it around a bit to get it into the mixture. Use about 1/4 cup per load. Makes enough to do about 32 loads of laundry.

---

## No-Grate Powdered Laundry Soap

### Ingredients:

- ½ cup Borax
- ½ cup Washing Soda
- ½ cup Oxi-Clean

Combine all ingredients and store in a container with a tight fitting cover or lid. For this mixture I use about 3 tablespoons per load. This trial size batch will do about 8 loads of laundry.
