

How to print the half size fillable weekly planner pages back-to-back

Here's the pattern to follow if you would like to have everything flow correctly

Front of page: Type in the dates for a complete week and print the page.

Put the page back in the printer's paper tray so you can print on the back of it

Back of page: For the next planner page, type in the dates for the first half of the week after the one you just printed, and the second half of the week before.

If you keep following along using this method everything will flow along correctly when the pages are cut in half and punched to be inserted in your planner.

Here's a chart to help show this method at work:

	<u>Sun - Wed</u>	<u>Thurs - Sat</u>
	Week 1	Week 1
On the back:	Week 2	Blank
	Week 3	Week 3
On the back:	Week 4	Week 2
	Week 5	Week 5
On the back:	Week 6	Week 4
	Week 7	Week 7
On the back:	Week 8	Week 6

Keep following along using this pattern until you have printed as many weeks as you wish.
